

BLOCKMASTER™

**The Perfect
Companion for
Your SnoWizard
SnoBall
Machine®!**

The BlockMaster™ icemaker has been designed to produce clean, pure, and sanitary blocks of ice, the perfect size to fit the SnoWizard SnoBall machine. The cabinet is constructed of durable gel coated fiber glass with polyurethane foamed-in-place insulation. The cabinet has a 20 year guarantee against leaking.

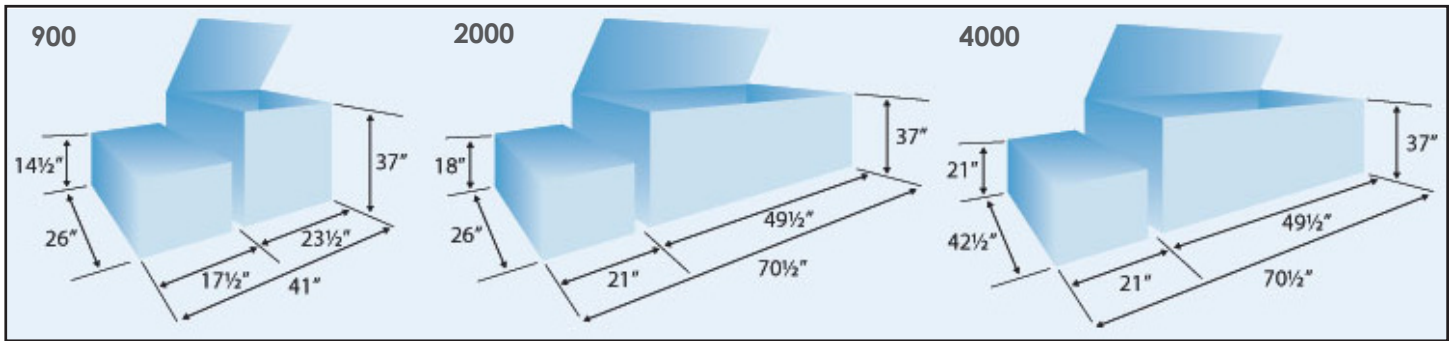

That's right! Now you can make your own block ice, the perfect size to use in your SnoBall machine. Each block measures 5" square by 15" in length, about 15 lbs per block. Perfect, pure, clean blocks of ice can be produced in approximately 14 hours in the convenience of your own business. No need to cut your own ice, or be at the mercy of the ice house for deliveries. The BlockMaster™ machines produce ice so efficiently, that most businesses can pay for its cost in less than 6 months of use.

ADVANTAGES

- Convenience of having your own ice
- No labor required to cut ice into blocks
- No loss of ice due to melting, chipping and waste
- No more trips to the ice house or waiting for ice deliveries
- Large 14 to 15 lb blocks produce more SnoBalls with less frequent recharging of ice.
- Uniform flat blocks of ice shaves easier and smoother for quality, consistent snow.
- Produce ice at approximately 10% to 15% of the cost of buying it.

Warranty: 1 Year all parts. 5 years on the compressor unit. Warranty work provided by the manufacturer.

Compare the cost of making your own BlockMaster™ to purchasing from an ice house.
You can easily see how in as little as 6 months your BlockMaster™ machine will pay for itself.

-----Bought from an ice house-----

DAILY ICE USE	NO. BLOCKS	DAILY COST	MONTHLY COST	6 MONTH COST	BLOCKMASTER™ 6 MONTH COST	SAVINGS
150 LBS	12	\$12	\$360	\$2160	\$224	\$1936
200 LBS	16	\$16	\$480	\$2880	\$298	\$2582
250 LBS	20	\$20	\$600	\$3600	\$373	\$3227
300 LBS	24	\$24	\$720	\$4320	\$448	\$872

Figures have been rounded to the nearest dollar amount. Ice cost is calculated at \$8 per 100 LBS. Savings reflected are passed only on ice cost and do not include other savings from reduced labor required to cut ice, transportation to pick up ice or delivery charges.

Ice production for all units based on ambient air temperatures of 70 degrees (F) and water temperature of 50 degrees (F). Operating cost will vary depending on amount of ice made, temperature of water going into ice cans, ambient air temperatures and local electrical rates. Figures given are average approximate costs.
